Chair Malcolm and Board Members,

Environmental Health Coalition (EHC) is not requesting to pull Items 5 and 9 from the consent agenda but wanted to express our support for these items. EHC is appreciative of the effort the Port has exerted to move forward with this important electrification project at TAMT including securing multiple sources of funds. Transitioning all sources of diesel particulate matter is critical to improve public health in portside communities that are most impacted and the electric cranes are an important element of that effort. EHC supports the allocation of funds, the resolution and the ordinance.

We look forward to continuing to support the Port's work to transition to zero emission and thank you for your diligence on this project.

Sincerely,

Diane

DIANE TAKVORIAN • EXECUTIVE DIRECTOR
